TITLE : VOICE INPUT OPERATION UNIT

ABSTRACT : PURPOSE: To quickly and smoothly perform recognition confirming processing and erroneous recognition processing, etc., accompanied by a voice input operation.

CONSTITUTION: When a voice recognition button on the display screen of a display part 4 is selected with the left button of a device (mouse) 5, the shape of a cursor in the position is changed by a control part 3 and a user is urged to vocalize. In this case, when the user input one of selectable operation buttons in voice, the voice is recognized at a voice recognition part 2 and the result is delivered to the control part 3. The control part 3 urges the recognition processing by the user by moving the cursor to the operation button corresponding to the first option of the recognized result and changing the shape of the cursor. When the user presses the left, center or right button of the device (mouse) 5 at this time, the control part 3 selects the operation button at the position of the cursor, moves the cursor to the operation button corresponding to the next option of the recognized result or moves the cursor to a voice recognition button.
